## **DETAILED ACTION**

### ***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:
2. The closest prior art of record, MacNaughton et al. U.S. Patent No.6020884 (hereinafter MacNaughton) is directed towards the generation of community bookmark list that is based on the submission of individual bookmarks by community members. Also, notes that may be comprised of a list of subject or topic related headings (i.e., forum message threads) that a user may peruse, a list of threaded messages relating to a particular subject or topic heading, or the contents of a particular message.
3. Whereas, Applicant's claimed invention is directed to building a list of favorite links from lists associated with other users that are viewing the same document and does not base its list of "community bookmarks" on the location of community members, along with other limitations of the presented claims as stated in claims 19 and 32 as well as Applicant's enabling portions of the specification, pages 15 – 18.
4. Applicant states in Remarks concerning claim 19 dated Oct. 14, 2003, pages 15 and 16, that MacNaughton does not disclose or suggest any mechanism for building a list of favorite links from lists associated with other users that are viewing the same document and does not base its list of "community bookmarks" on the location of community members.
5. Nor does MacNaughton disclose to associate a second hypertext document with the second user in response to user input from the second user, and to notify the first user of the association of the second hypertext document with the second user, and wherein the program is further configured to build a list of favorite links associated with the hypertext document being

viewed by the first user by combining lists of favorite links associated with each user currently viewing the same hypertext document as the first, (see Applicant's enabling portion of the specification pages 15 – 18).

6. Thus, as stated above, MacNaughton as well as previously cited prior art does not teach or suggest the above limitations in combination with all of the limitations of the independent claims.

7. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Claims 19 and 32 are allowed.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. a. Bates et al. U.S. Patent No. 6832350 discloses Organizing and categorizing hypertext document bookmarks by mutual affinity based on predetermined affinity criteria.

11. b. Bates et al. U.S. Patent No. 6557015 discloses Determining whether a second hypertext document is included in a list of active document trails.
